American Tragedy for Amazon Prime Taare Zameen Par is one of those gripping films that you start watching and think this is a Bollywood film. . He was the most polished Indian actor before SRK came along. What about the hip-hop theme? Hello, I am one of those people who are often accused of having a fascination with Bollywood film and Indian cinema.Q: How can I set up my postgresql database with the "dot" character? I want to use the dot character to represent a database. If I run the command \dx I get this: is there a way to use the dot character in the file name of the database? The pre-defined database names are: data0 data1 data2 A: Try configuring PostgreSQL with the locale dot (instead of a dashes). This could have worked with PostgreSQL 7.x. It doesn't with PostgreSQL 9.x. You could go with an other naming. There is now an encoding.dot locale: Locale for matching dot-encoded characters in path names The locale should be supported by: PostgreSQL locale support PostgreSQL site, also you can find on pg_get_encoding_message() : Support for locale when looking for a database name. We use the name returned by pg_get_encoding_message() on input, and if that returns the empty string, we use the default encoding of the current locale, as determined by C.A.R.M.P.D.D. A: PostgreSQL just does not support any dot (period) character as a database name. In one of the plpgsql routines I use it as a common identifier for my own databases, but I use different names. It's a pity but I think the reason is that dot indicates some sort of a subfolder or a network drive. I suspect that PostgreSQL does not like to read subfolders or access via Network Drives. And there's always the possibility that names containing dots or that exceed a 'reasonable' size are conflicts that PostgreSQL does not like. I have been advised by an admin at PostgreSQL to just remove this feature, but since this is just the DB system anyway it's not all that bad. There
